

Alina Tsui

Data Analyst

New York, NY · alina@cloudwithme.net · [linkedin.com/in/alinatsui](https://www.linkedin.com/in/alinatsui) · github.com/ALINATSUI

SUMMARY

Data Analyst with a background in IT operations, AWS and GCP certified. Hands-on experience building end-to-end data pipelines: querying and aggregating datasets with SQL and Python, performing exploratory data analysis and statistical modeling, and deploying interactive dashboards with Streamlit. Comfortable working across the full data lifecycle — from data cleaning and wrangling to analysis and visualization.

TECHNICAL SKILLS

Languages & Query: Python, SQL, Bash

Data Analysis & Wrangling: pandas, NumPy, exploratory data analysis (EDA), data cleaning, statistical analysis, scikit-learn

Data Visualization & BI: Streamlit, Matplotlib, Tableau

Platforms & Tools: Google BigQuery, REST APIs, GitHub Actions, GCP/AWS (certified)

Tools & Environments: Jupyter Notebooks, Git, GitHub, Streamlit

PROJECTS

European Ski Resort Analysis – Unsupervised & Supervised learning (*Capstone Project, 5-person team*)

Python · scikit-learn · pandas · Random Forest · PCA · K-Means

- Sole owner of the supervised regression and unsupervised clustering analysis within a 5-person team

CitiBike Ridership Analysis

June 2026

Python · SQL · BigQuery · Streamlit · GCP · GitHub Actions · Selenium

- Built and deployed a full-stack data analytics app analyzing NYC bike-share ridership against weather patterns, querying 53M+ records from CitiBike and NOAA public datasets on Google BigQuery
- Engineered dual BigQuery authentication paths (DuckDB BigQuery extension + google-cloud-bigquery client), managing credentials via GCP IAM service accounts and secure secrets configuration
- Implemented data caching for low-latency user experience and automated uptime via GitHub Actions/Selenium cron jobs

Live app: <https://citibike-ridership.streamlit.app/> · https://github.com/ALINATSUI/Citibike_Ridership

NYC Job Skills Dashboard

July 2026

Python (Dash, Plotly, pandas) · NLP · NYC Open Data · Bluedoor API's

Built during the Bloomberg – TKH (The Knowledge House) Hackathon

- Built an interactive dashboard analyzing 28,000+ NYC job postings across all five boroughs, using NLP-based skill extraction (ojd-daps-skills taxonomy) to surface in-demand skills, salary trends, and hiring concentration by industry and borough
- Sourced data from public (NYC OpenData) and private-sector (Bluedoor API) job postings, with automated email delivery of curated job matches via Resend on a custom domain

https://github.com/ALINATSUI/Project_NYCJobs

EXPERIENCE

System Engineer

Jan 2022 – Aug 2025

Sentant Networks (Remote) — Security-focused MSP

- Generated and analyzed compliance reports using Google Application Manager (GAM) scripting, querying user activity data and delivering structured findings to stakeholders
- Automated administrative workflows using Python and scripting tools (GAM, PowerShell) for tasks including mailbox configuration, delegate access, and account lifecycle management
- Administered Google Workspace and Microsoft O365 environments; coordinated with vendors on escalations and maintained SaaS application security
- Onboarded and offboarded users with timely stakeholder communication and audit-ready documentation

Helpdesk Administrator

2020 – 2021

STUDIOS Architecture · New York, NY

- Maintained uptime for 100 endpoints, servers, and network devices in a high-demand design firm environment
- Automated software deployment to workstations using PDQ, minimizing downtime for architectural teams
- Led cross-functional IT projects including RTO initiative planning, A/V infrastructure design, and E-waste program management

IT Support

2017 – 2020

Urban Justice Center · New York, NY

- Member of a 2-person IT team supporting a multi-office nonprofit; managed NTFS permissions, distribution lists, and user account lifecycle
- Led organization-wide Windows 10 workstation upgrade; researched and presented fiber & VoIP infrastructure upgrade proposals to management

CERTIFICATIONS & AWARDS

AWS Solutions Architect – Associate

Issued Dec 2024

Google Associate Cloud Engineer

Issued Jul 2024

AZ-900 – Microsoft Azure Fundamentals

Issued Nov 2023

AWS All Builders Welcome Grant (2023): Competitive grant awarded a conference entry to AWS re:Invent conference, immersive learning and community building for cloud builders.

EDUCATION

Data Analytics Fellowship — The Knowledge House

Feb 2026 – Present

2026 Innovation Fellow

Relevant Coursework: Python, SQL, Statistics, Machine Learning, pandas, Google BigQuery

Develop in Swift Fundamentals — New York Public Library (NYPL)

Sep – Dec 2025

Certificate, IT Support — Per Scholas

B.A., Political Science — City College of New York
