

Alina Tsui

Data Analyst

New York, NY · alina@cloudwithme.net · [linkedin.com/in/alinatsui](https://www.linkedin.com/in/alinatsui) · github.com/ALINATSUI

SUMMARY

AWS and GCP certified data analyst with a specialty in IT operations and an expertise in working across the full data lifecycle – from data cleaning and wrangling to analysis and visualization. In addition to hands-on experience building end-to-end data pipelines, have proficiency in querying and aggregating datasets with SQL and Python, performing exploratory data analysis, implementing statistical modeling, and deploying interactive dashboards with Streamlit and Tableau.

TECHNICAL SKILLS

Languages & Query: Python, SQL, Bash

Data Analysis & Wrangling: pandas, NumPy, statistical analysis, scikit-learn

Data Visualization & BI: Streamlit, Matplotlib, Tableau

Platforms & Tools: Google BigQuery, REST APIs, GitHub Actions, GCP/AWS

EXPERIENCE

System Engineer

Jan 2022 – Aug 2025

Sentant Networks (Remote) — Security-focused MSP

- Generated and analyzed compliance reports using Google Application Manager (GAM) scripting, querying user activity data and delivering structured findings to stakeholders
- Automated administrative workflows using scripting tools (GAM, PowerShell) for tasks including mailbox configuration, delegate access, and account lifecycle management
- Administered Google Workspace and Microsoft O365 environments; coordinated with vendors on escalations and maintained SaaS application security
- Onboarded and offboarded users with timely stakeholder communication and audit-ready documentation

Helpdesk Administrator

Apr 2020 – Dec 2021

STUDIOS Architecture · New York, NY

- Maintained uptime for 100 endpoints, servers, and network devices in a high-demand design firm environment
- Automated software deployment to workstations using PDQ, minimizing downtime for architectural teams
- Led cross-functional IT projects including RTO initiative planning, A/V infrastructure design, and E-waste program management

IT Support

Mar 2017 – Apr 2020

Urban Justice Center · New York, NY

- Owned NTFS permission, distribution lists, and full user account lifecycle across 3 satellite offices as part of 2-person IT team, ensuring consistent access control and onboarding/offboarding with minimal delay
- Led organization-wide Windows 10 workstation upgrade; researched and presented fiber & VoIP infrastructure upgrade proposals to management

PROJECTS

Aug 2026

European Ski Resort Analysis – Unsupervised & Supervised learning (Capstone Project, 5-person team)

Python · scikit-learn · pandas · Random Forest · PCA · K-Means

- Sole owner of the supervised regression and unsupervised clustering analysis within a 5-person team
- Built a Random Forest regression model to predict day pass pricing from slope difficulty mix and country, improving test R2 from 0.38 (slopes-only) to 0.74 by incorporating country features, while reducing overfitting.

CitiBike Ridership Analysis

June 2026

Python · SQL · BigQuery · Streamlit · GCP · GitHub Actions · Selenium

- Built and deployed a full-stack data analytics app analyzing NYC bike-share ridership against weather patterns, querying 53M+ records from CitiBike and NOAA public datasets on Google BigQuery
- Engineered dual BigQuery authentication paths (DuckDB BigQuery extension + google-cloud-bigquery client), managing credentials via GCP IAM service accounts and secure secrets configuration
- Implemented data caching for low-latency user experience and automated data pipeline infrastructure: Integrated DuckDB with BigQuery for efficient in-process SQL querying and established a GitHub Actions workflow using headless Selenium cron job to maintain Streamlit app uptime

Live app: <https://citibike-ridership.streamlit.app/> · https://github.com/ALINATSUI/Citibike_Ridership

NYC Job Skills Dashboard

July 2026

Python (Dash, Plotly, pandas) · NLP · NYC Open Data · Bluedoor API's

Built during the Bloomberg – TKH (The Knowledge House) Hackathon

- Built an interactive dashboard analyzing 28,000+ NYC job postings across all five boroughs, using NLP-based skill extraction (ojd-daps-skills taxonomy) to surface in-demand skills, salary trends, and hiring concentration by industry and borough
- Sourced data from public (NYC OpenData) and private-sector (Bluedoor API) job postings, with automated email delivery of curated job matches via Resend on a custom domain

https://github.com/ALINATSUI/Project_NYCJobs

CERTIFICATIONS

AWS Solutions Architect – Associate, Amazon Web Services

Expires Dec 2027

Google Cloud Associate Cloud Engineer, Google Cloud

Expires Jul 2027

Microsoft Azure Fundamentals (AZ-900), Microsoft

Does not expire

TECHNICAL AWARDS

AWS All Builders Welcome Grant (2023): Selected through a competitive application to attend AWS re:Invent, the flagship global cloud conference, gaining hands-on training and building community with fellow practitioners.

EDUCATION

Web Development — CodePath

Sept 2026 —
Expected Apr 2027

Currently completing WEB 101 (HTML, CSS, JS); program continues through component architecture/React and full-stack (PostgreSQL, Node.js, Express)

Data Analytics Fellowship — The Knowledge House

Feb 2026 – Sep 2026

2026 Innovation Fellow

Relevant Coursework: Python, SQL, Statistics, Machine Learning, pandas, Google BigQuery, Exploratory Data Analysis, Data Visualization

Develop in Swift Fundamentals — New York Public Library (NYPL)

Sept – Dec 2025

Certificate, IT Support — Per Scholas

B.A., Political Science — City College of New York
